HENRY FORD said in 1933
 "THE V-8 IS THE COMING CAR
 FOR THE MAJORITY OF
 AMERICAN DRIVERS"

Ford V-8 Sales Prove It

In 1932 (U. S. only)	154,955
In 1933 (U. S. only)	342,569
In 1934 (U. S. only)	673,197
In 1935 (U. S. only)	1,064,118

In 1935 the Ford V-8 led ALL makes in total sales

Such a record could not have been made as the result of performance alone. Without traditional Ford operating economy, more than two and a half million Ford V-8 cars could not have been sold.

Judge this car not on price alone, but also on the quality that is built into it. You will find the Ford V-8 **THE MOST UNDERPRICED CAR IN AMERICA**

We invite you to ride in and drive the finest and most economical Ford car ever built—the great new Ford V-8 for 1936.
